

Senal Anuraheesara

Data Science undergraduate

senalanuraheesara@gmail.com | +94 76 941 2240 | Gampaha, Sri Lanka | [LinkedIn Profile](#) | [Github Profile](#) | [Portfolio Website](#)

PROFILE SUMMARY

Third-year undergraduate at the Sri Lanka Institute of Information Technology (SLIIT) specializing in Data Science, currently maintaining a CGPA of 3.0. Skilled in data analysis, machine learning fundamentals, data visualization, and statistical analysis using Python and SQL. Possess hands-on experience in web development with HTML, CSS, JavaScript, React, Node.js, and Spring Boot, having completed several full-stack projects. Seeking an internship opportunity to further develop technical expertise while contributing effectively to organizational goals.

EDUCATION

- Bachelor of Science in Information Technology (Specializing in Data Science)** (2024 - present)
 - Sri Lanka Institute of Information Technology (SLIIT), Malabe, Sri Lanka
- G.C.E. Advanced Level – Bandaranayake College, Gampaha** 2023(2024)
 - Physical Science Stream | 2C's & 1S
- G.C.E. Ordinary Level – Bandaranayake College, Gampaha** 2020(2021)
 - 7A's & 2B's

Technical SKILLS

- Data Analytics Tools and Libraries:** Python, R, Pandas, NumPy, SQL
- Data Analysis Techniques:** Data Cleaning, Data Wrangling, Exploratory Data Analysis (EDA), Statistical Analysis
- Graphic Design:** Adobe Photoshop, Adobe Premiere Pro, Canva, Capcut, Illustrator, Figma
- Databases and Data Management:** MySQL, SQL Server, MongoDB, Mongoose ODM
- Programming Languages:** C, C++, Java, JavaScript
- Web Technologies:** HTML5, CSS3, PHP, Node.js, React.js
- Version Control and Collaboration:** Git, GitHub
- Data Annotation and Labeling:** Label Studio

Soft Skills

- Ability to learn new technologies quickly and apply them effectively
- Experienced in managing academic and project deadlines efficiently
- Full professional proficiency in English
- Clear and confident communication skills, including reporting and presenting insights
- Strong teamwork and collaboration skills with the ability to work effectively in diverse teams

PROJECTS & EXPERIENCES

- SHANARTS — Full-stack printing management system with ML-based delay prediction.**
GitHub: <https://github.com/senalanuraheesara/ShanArts> **Live:** <https://shan-arts.vercel.app/>
 - ❖ Developed a full-stack printing management system using React, Node.js, Express, and MongoDB.
 - ❖ Designed and integrated an ML-based job delay prediction system using FastAPI, scikit-learn, and XGBoost.
 - ❖ Built a machine learning pipeline for delay-risk analysis with confidence scoring and automated risk classification.
 - ❖ Integrated REST APIs for order management, scheduling, inventory tracking, billing, and prediction services.
 - ❖ Implemented secure authentication and Google OAuth login using JWT-based authorization.
 - ❖ Deployed and managed frontend/backend services using Vercel, Railway, and environment-based configurations.

- **Diabetes Prediction Using Machine Learning**

GitHub: <https://github.com/senalanuraheesara/Diabetes-Prediction-Using-Machine-Learning>

- ❖ Developed a supervised machine learning model using Python and Scikit-learn to predict diabetes from clinical and demographic health data.
- ❖ Performed data preprocessing with Pandas and NumPy, including cleaning, feature scaling, encoding, and outlier handling.
- ❖ Conducted Exploratory Data Analysis using Matplotlib and Seaborn to identify key risk factors such as BMI, glucose level, and blood pressure.
- ❖ Applied SMOTE from Imbalanced-learn to handle class imbalance and implemented multiple classifiers including Decision Tree, Random Forest, SVM, MLP, and XGBoost.
- ❖ Achieved 99% accuracy with a Decision Tree classifier using Accuracy, Precision, Recall, and F1-Score.

- **Avurudu Nakath 2026 – Mobile Application Development**

GitHub: <https://github.com/senalanuraheesara/Avurudu-Nakath> [ExpoHub](#)

- ❖ Developed an Expo React Native (TypeScript) mobile application to display Sinhala & Hindu New Year auspicious times (Nakath 2026) with a clean and interactive UI.
- ❖ Implemented an offline-first architecture where all nakath data is stored locally (no backend/API), ensuring fast and reliable access.
- ❖ Built core features such as countdown timers, active nakath highlighting, and full schedule management with past and upcoming event tracking.
- ❖ Added multi-language support (Sinhala, English, Tamil) and integrated local notifications and compass-based guidance features for enhanced user experience.
- ❖ Used technologies including React Native, Expo, TypeScript, AsyncStorage, EAS Build, and managed Android APK deployment via Expo EAS cloud build system.

- **Pet Care Management App** **GitHub:** <https://github.com/senalanuraheesara/PetCare-Management-System>

- ❖ Developed a full-stack Pet Care Management System using React Native (Expo) mobile app and Node.js / Express REST API with MongoDB (Mongoose) for data persistence.
- ❖ Implemented role-based authentication (JWT) supporting pet owners, vets, and admins with secure access control and protected API routes.
- ❖ Built core modules for managing pets, appointments, vaccinations, grooming, boarding, diet, and medications, enabling end-to-end pet healthcare tracking.
- ❖ Integrated backend services including OTP-based registration (email/SMS fallback), file uploads (Multer), and optional Cloudinary storage for media handling.
- ❖ Developed an admin dashboard API layer for managing vets, schedules, bookings, and system catalogs with automated admin seeding on server startup.

CERTIFICATIONS & Badges

AI/ML Engineer Stage 1, SLIIT — May 2026

Diploma In ICT – ICBT Campus Gampaha (2024)

GitHub for Beginners Program – Certified Completion

Microsoft Azure & AI Agents Workshop (2026)
