PROJECTS & EXPERIENCES

- Web-Based Customer Support System** [\[GitHub\]](#) - Associate with SLIIT (Y2 S1 Project)
Built a full-stack ticket management platform with role-based access, live chat, FAQ system, feedback tracking, and admin analytics dashboard following MVC architecture and Agile practices.
- Diabetes Prediction Using Machine Learning** [\[GitHub\]](#) - Associate with SLIIT (Y2 S1 Project)
Developed a machine learning model to predict diabetes using health indicators such as BMI, glucose levels, and blood pressure. Implemented data preprocessing, SMOTE for class imbalance handling, and evaluated multiple classification models, achieving 99% accuracy with a Decision Tree classifier.

- **Portfolio Website** [\[GitHub\]](#) [\[Live Demo\]](#)

Developed and deployed a responsive personal portfolio website using React and Vite to showcase my skills, projects, and professional profile. Built with modern web development practices, this project highlights my ability to create interactive and visually appealing user interfaces and publish a live web application.

- **Avurudu Nakath 2026 – Mobile Application Development** [\[GitHub\]](#)

Developed a cross-platform mobile application for Sinhala & Tamil New Year (Avurudu Nakath 2026), providing accurate ritual schedules, real-time countdowns, and multilingual support (Sinhala, English, Tamil) through a clean and user-friendly interface using React Native and Expo.

- **Smart Study Assistant** [\[GitHub\]](#) - *Currently under active development*

Developed an AI-powered Smart Study Assistant web application that helps students understand complex topics through automated summaries, explanations, and interactive learning features, improving study efficiency and productivity.

- **SHANARTS — Printing Management System** [\[GitHub\]](#) [\[Live\]](#) - *Associate with SLIIT (Y2 S2 AIML Project)*

Developing a full-stack printing management system with AI-powered delay risk prediction (XGBoost) and automated customer communication. Built using React, Node.js, Express, MongoDB, and FastAPI, with ongoing enhancements.
